Claims 16 and 18

These claims do not appear to be novel in view of document 1 cited in the ISR. An apparatus in which URLs are specified as display instruction information for displaying information by means of, for example, a web browser is well known.

Claims 1-15, 17 and 19-24

None of the documents cited in the ISR describes a printer that receives the position information indicating the place where the printing instruction information expressing the content of printing instruction to the printer is stored, for thereby receiving the instruction to start the printing of printing data. This constitution is not considered to be obvious to a person skilled in the art either.
